1449 VOL-36

1-21
Library of the Museum

OF

COMPARATIVE ZOOLOGY,

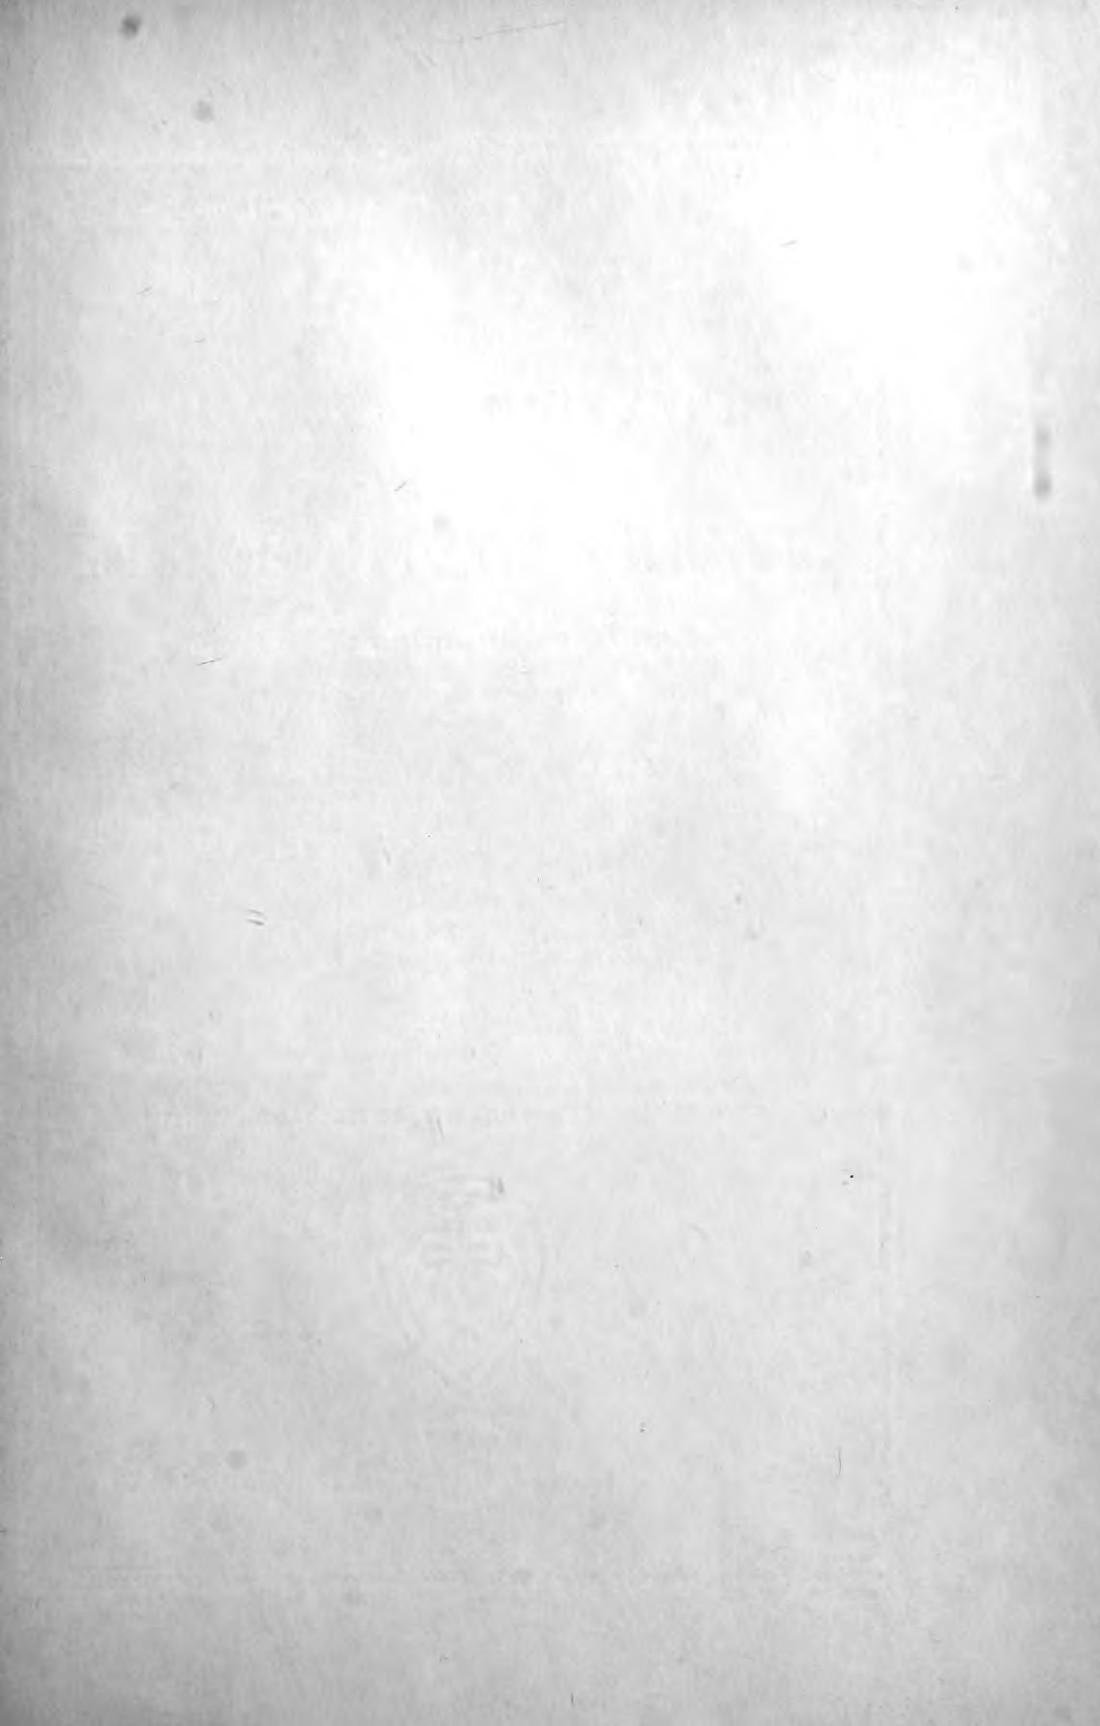

AT HARVARD COLLEGE, CAMBRIDGE, MASS.

Founded by private subscription, in 1861.

~~~~~  
Deposited by ALEX. AGASSIZ.

No. 7527.

June 7 Oct. 4. 1894

New Series, No. 141 (Vol. 36, Part 1).

Price 10s.

APRIL, 1894.

7524

1949  
1-21

THE

# QUARTERLY JOURNAL

OF

# MICROSCOPICAL SCIENCE.

Special Complimentary Number

DEDICATED BY HIS COLLEAGUES

TO

E. RAY LANKESTER, M.A., LL.D., F.R.S.

In Celebration of the Completion of Twenty-five Years  
of Editorship.

EDITED BY

ADAM SEDGWICK, M.A., F.R.S.,

*Fellow and Lecturer of Trinity College, Cambridge;*

AND

W. F. R. WELDON, M.A., F.R.S.,

*Jodrell Professor of Zoology and Comparative Anatomy in University College, London;  
Fellow of St. John's College, Cambridge.*

WITH LITHOGRAPHIC PLATES AND ENGRAVINGS ON WOOD.

LONDON:

J. & A. CHURCHILL, 11, NEW BURLINGTON STREET.

1894.

**CONTENTS OF No. 141.—New Series.**

**MEMOIRS:**

|                                                                                                                                                                                                                                                                                               | PAGE |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| A Contribution to the Morphology of Bacteria. By E. KLEIN, M.D.,<br>F.R.S., Lecturer on General Anatomy and Physiology at St. Bartholomew's Hospital Medical School. (With Plate 1) . . . . .                                                                                                 | 1    |
| On Certain Points in the Development and Anatomy of some Earth-worms. By ALFRED GIBBS BOURNE, D.Sc., Professor of Biology in<br>the Presidency College, Madras. (With Plates 2—5) . . . . .                                                                                                   | 11   |
| On the Law of Development commonly known as von Baer's Law ;<br>and on the Significance of Ancestral Rudiments in Embryonic De-<br>velopment. By ADAM SEDGWICK, M.A., F.R.S. . . . .                                                                                                          | 35   |
| A Contribution to our Knowledge of the Annelida.—On some Points<br>in the Structure of <i>Euphrosyne</i> . On Certain Young Stages in<br><i>Magelona</i> , and on Claparède's unknown Larval <i>Spio</i> . By W. C.<br>MCINTOSH, Marine Laboratory, St. Andrew's. (With Plates 6—8) . . . . . | 53   |
| Spolia Nemoris. By A. A. W. HUBRECHT, LL.D., C.M.Z.S., Pro-<br>fessor of Zoology in the University of Utrecht. (With Plates<br>9—12) . . . . .                                                                                                                                                | 77   |

New Series, No. 142 (Vol. 36, Part 2).
